## ABOUT US

Nanjing Firsun Biotechnology Co., Ltd. (hereinafter referred to as Firsun Biotechnology), founded in 2016 and located in Nanjing, the capital of Six Dynasties in ancient China, was set up by personnel studying abroad. Relying on domestic scientific research institutions such as Zhejiang University and the Chinese Academy of Sciences, it is an integrated company with the vision of Serving the Diagnostic Reagent Industry, specializing in providing high-quality and core diagnostic raw materials and technical services for diagnostic reagent companies. Firsun Biotechnology currently has a professional research and production base of nearly 2000 square meters. In strict accordance with the 13485 Quality Management System, the products developed have been widely used in chemiluminescence, immunochromatography and other technical platforms of in vitro diagnostic reagents, and received favorable reviews by customers.

To actively promote the international development strategy, Firsun Biotechnology has established close cooperative relations with many international well-known manufacturers, and gradually realized the integration of technology, brand, market, team and management with international standards.

In the future, Firsun Biotechnology will continue to carry on standardized management in strict accordance with the company's requirements, further improve the company's core competitiveness, rely on high-tech products, take excellent talents as the guide, grasp the overall situation, work together with customers to strive for the common and healthy development of mankind.
